

coffee grounds fertilizer recipe

Ingredients:

- Used coffee grounds
- Water

Notes:

- Acid-Loving Plants: Beneficial for roses, azaleas, and blueberries.
- Moderation: Use sparingly, especially in alkaline soils.

Usage Recommendations:

Spread used coffee grounds evenly around the base of your plants and gently mix them into the soil. Avoid applying coffee grounds directly onto plant foliage to prevent burning. Water the area after application to help the nutrients from the coffee grounds seep into the soil.

Instructions:

1. Collect used coffee grounds from your coffee maker or filter.
2. Spread the coffee grounds evenly around the base of your plants.
3. Gently mix the coffee grounds into the soil.
4. Water the area to help the nutrients from the coffee grounds seep into the soil.

Grow, flourish, and bloom!
